Summary

Adaptable Software Engineer (CS – AI & ML, graduating 2027) with hands-on experience across full-stack web development, backend engineering, and applied AI/ML systems. Proficient in Python, Java, TypeScript, and modern frameworks with a solid foundation in data structures, OOP, and system design. Demonstrated track record of building production applications, designing robust APIs, and collaborating in agile teams to ship high-impact software solutions.

Skills

Languages: Python, TypeScript, JavaScript, Java, C
Frameworks: React.js, Next.js, Node.js, Express.js, Spring Boot, Flask, FastAPI
Databases & Queues: PostgreSQL, MongoDB, Firebase/Firestore, Redis (BullMQ), SQLite, SQLAlchemy, Spring Data JPA
AI, ML & Data: PyTorch, TensorFlow, LoRA Fine-Tuning, Prompt Engineering, NLP, Computer Vision, OpenCV, scikit-learn, Pandas, Tableau
Cloud & DevOps: Docker, Docker Compose, GitHub Actions, CI/CD, Vercel, Render, Azure, AWS, Oracle Cloud (OCI – Certified)
Tools & Practices: Object-Oriented Programming (OOP), Git Version Control, Debugging & Troubleshooting, Clean Code Practices, Agile/Scrum, Peer Code Reviews, Jira, Technical Documentation

Professional Experience

Software Developer Intern Aug. 2026 – Present
StoryTent (Daxinataha Mastishk Media) *Thane, India / Remote*
- Maintained source code and integrated external packages across both the StoryTent mobile app and web portal, ensuring seamless cross-platform functionality.
- Developed and deployed additional full-stack features to enhance user experience, optimizing backend performance and frontend responsiveness.
- Mitigated IT infrastructure delivery challenges by streamlining deployment pipelines and enhancing system stability.

Full Stack Software Development Intern Apr. 2026 – Sep. 2026
ElevanceSkills *Remote*
- Architected and developed **Twiller 2.0** following clean code practices and software design principles. Built scalable REST API endpoints and enhanced components across the full-stack system.
- Collaborated in cross-functional Agile teams using Jira & Confluence. Managed codebase via Git version control, engaging in peer code reviews and resolving defects through rigorous debugging.
- Delivered robust features including tiered billing and real-time feeds, ensuring software met specific business needs through continuous improvement.
- Optimized database queries and integrated third-party services, reducing latency by 20% and improving overall system reliability.

Student Mentor & Council Member Dec. 2025 – Present
Centre for Innovation & Entrepreneurship (CIE), Sreyas Institute of Eng. & Tech. *Hyderabad, India*
- Mentored 100+ students in Python programming, OOP concepts, Flask web development, and Git-based version control through structured problem-solving discussions and code reviews.
- Guided teams in the documentation and maintenance of software components, ensuring clarity, code quality, and ease of future updates for prototype solutions.

Projects

Twiller – Social Media Platform | GitHub | *Next.js, TypeScript, Express.js, MongoDB, Firebase*
- Architected a full-stack SaaS platform featuring tiered subscriptions, Razorpay payments, audio tweets, and 15+ REST endpoints.
- Implemented real-time feeds, OTP login verification, and device session tracking; deployed scalable services on Vercel and Render.

SecureBankPro | GitHub | *Java, Spring Boot, Spring Security, PostgreSQL, JWT*
- Developed a production-style banking REST API with JWT authentication, role-based access control (RBAC), and Swagger UI docs.
- Engineered idempotent transactional money transfers and audit logging with Spring Data JPA, ensuring strict financial ACID guarantees.

AI Car Racing – PPO Autopilot | GitHub | *Python, PyTorch, Reinforcement Learning, CNNs*
- Trained a deep reinforcement learning agent using Proximal Policy Optimization (PPO) to master high-speed track navigation.
- Built a custom 4-layer CNN with frame stacking in Gymnasium and developed a real-time Pygame telemetry HUD for live agent metrics.

E-Commerce ETL Pipeline & Analytics | GitHub | *Python, Pandas, SQLite, scikit-learn*
- Engineered an end-to-end data pipeline processing 1.06M records, automating extraction, transformation, and RFM cohort segmentation.
- Designed a structured SQLite data warehouse and trained scikit-learn predictive models to forecast customer churn with actionable insights.

Education

Sreyas Institute of Engineering & Technology Hyderabad, India
B.Tech, Computer Science & Engineering (AI & ML) – CGPA: 8.2 *Expected Graduation: 2027*
